

Stringing up the Lights!

Use **gray construction paper**, 9x12.

With **black sharpie marker** draw a long wavy line, or two, stretching from one side of the page to the other. Add bulbs with rectangular “connectors”.

Use **chalk pastels** to add light to the bulbs.

Make the bulbs “glow” by smearing the chalk with your finger or a tissue from the inside out.

Sign and hang your work!

Reflect: Why was chalk pastels a great **medium** for this project?
