

Value Ice Cream Cones

Fold a sheet of paper in half, half again, and half one more time to create 6 equal spaces.

Paint each space with a different value of one color. Start with the color by itself and then gradually add more and more white to create lighter and lighter tints of that color.

Allow values to dry over night.

Draw ice cream scoop shapes on the back of each value. Draw scoops as large as you can!

Cut a cone or bowl out of construction paper.

Starting from the bottom of the paper, glue the bowl or cone down first and then overlap scoops of ice cream with the darkest values at the bottom, lightest value on top.

Reflect: what kind of texture or pattern can you add to your bowl or cone to make your art-work unique from everyone else's?

Sign and hang your work!
