

Abstract Name Design

Another process of abstraction is simply cutting up an image and rearranging to form a new composition. Remember the Wavy Line Collage??

Draw your name in bubble or block letters to fill a 12x12 square. Stretch your letters tall so you don't leave any empty space at the top or bottom of your paper! This is important!! Color your letters in with black sharpie or black paint.

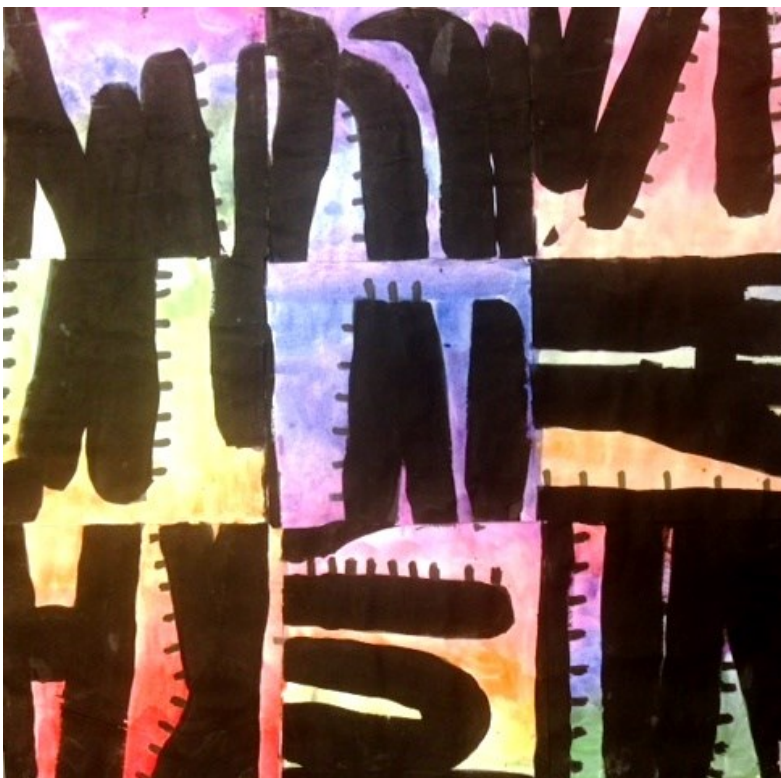

Cut your design on the paper cutter into 3inch vertical strips.

Cut 3inch strips into 3inch squares.

Rearrange your squares into a new formation and glue on a new 12x12 paper.

Paint the negative spaces between the black shapes that were the letters.

Sign and hang!

Reflect: How can you alter your name design so that you have a completely unique solution at the end of this process?
