

# Art History Periods (Pre and Post Assessment)

Assess what the students already know about identifying art from specific art history periods by having them complete the art history pre-assessment (without any help or instruction!) Students will attempt to name each artwork according to the Art Period in which it belongs.

After taking up the pre-assessments, share and discuss the Art History Periods PowerPoint illustrating the unique characteristics of each art period. Discuss ideas on how to identify artworks according to the specific styles and subject matter of each art period.

Students should take notes on the notetaking guide.

Use the notetaking guide as a study guide in preparation for a Post Assessment.

Reassess using the post assessment.
