

# Shattered color wheel

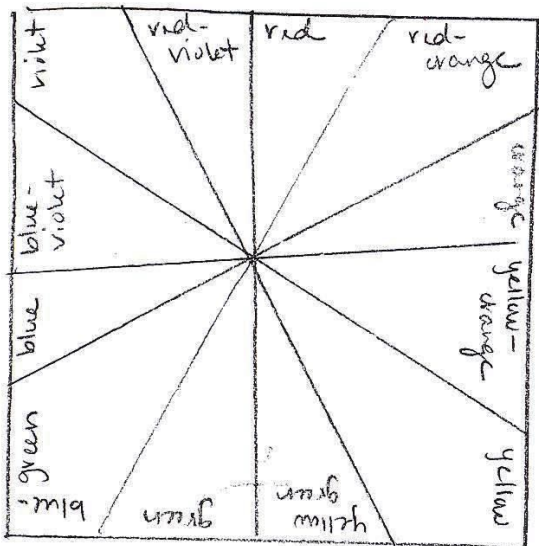

Start with 12 x 12 paper (or any sized square)  
 Put a tiny measure mark (dot) in the middle of  
 the paper.  
 Use a 18 inch ruler to draw 6 diagonal lines  
 through the measure mark from one side  
 of paper to the other

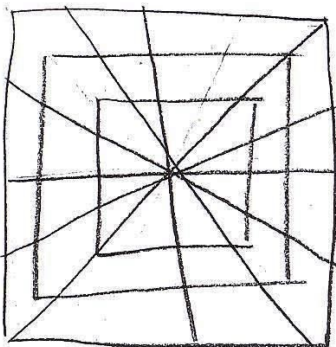

You should have 12 triangles.

Each triangle represents a color on the color  
 wheel.

Label each triangle according to color wheel,  
 Label LIGHTLY & small-close  
 to the edge of the paper so you  
 can erase easily later.

Split each triangle into 3  
 sections by drawing 2 squares  
 (one large, one small) around  
 center dot.

Paint outer square shades

Paint middle square pure hue

Paint inner square Tints
